

Life science projects in Japan

(http://togodb.dbcls.jp/lldb_project_en)

○ **Brief Description**

Information such as, summary, implementing period, data release status, achievements of life science projects funded by four ministries of Japan are browsable and downloadable.

○ **Features**

- Presents an overview of about 70 life science projects carried out in Japan from the 1990s - present.
- There are external links to the achievements (databases, downloadable data, publications, if any) of projects.
- Descriptions and various information of the projects were collected and organized manually in Japanese and then translated to English. It also provides links to the original source, where the original source is available in English.

○ **Uses**

- Refer to past projects and their achievements when writing reports or preparing manuscripts
- Download data obtained by past projects and use them to create secondary databases, mine data, etc.
- Refer to past projects when planning a new research project.

○ **Planned Features**

- Add other life science related projects carried out in Japan.

○ **Questions & Comments** info@dbcls.rois.ac.jp
