Wired-Marker

(https://addons.mozilla.org/en-US/firefox/addon/6219)

Latest Version:

Wired-Marker 3.6.10021200 Works with Firefox 2.0-3.6

○ **Brief Description**

Totally different from a well known scrapbook or bookmark. Wired-Marker is a Firefox add-on and generates dynamic URLs for pinpoint links and marked Web pages. (Over 350,000 downloads!)

○ Features

・An "Indelible Highlighter" on Web Pages

The highlighted sections remain visible on the page when you revisit it. You can also customize the color and style of the highlighter.

・A Pinpoint Electronic Bookmark

All information necessary for highlighting a section of a Web page is ENCODED as a unique dynamic URL that uses XPath to jump to the position of description. This URL ensures a pinpoint link to the high-lighted section.

・Scrapbook Folder

A scrapbook is generated when pictures in a Web page are highlighted. Each highlighted page is automatically cached as a back-up, in case the highlighted page disappears.

・Export Function

All information contained in a folder can be exported as a file or be exchanged between users, just by sending the dynamic URL.

○ Uses

・For writing scientific research papers (e.g., for organizing references and quoted sentences).
・For annotation of data with pinpoint links (Web pages, figures, tables, in html form).
・For engaging in research field work on the Internet for various investigations.

○ Planned Features

Applicable to PDF files.
